Medical Policy

Northeast Surfing is sharing with you the following sections of our medical policy as required by the Commonwealth of Massachusetts Department of Public Health.

Health Forms and Waivers

Health forms and waivers must be turned in prior to or on the first day of your child’s camp. It is recommended to submit all forms before your week starts by US mail, email or fax. No children will be accepted on the first day of camp without medical forms or waiver. Massachusetts’s regulations require an updated Health History form each year.

Illness and Injuries

In the event of a health emergency trained staff personal will make your child comfortable in an area safe and away from other campers. Our staff will then contact you (the parent) or one of the individuals you have authorized to pick up your child. If immediate medical attention is needed or if the severity of an injury cannot be correctly established, parents will be notified immediately. The Emergency Medical System (911) will be activated at the discretion of Camp Director or the camps Health Supervisor. If staff is unable to reach parents whose child is in need of immediate medical attention, he/she will be transported to the nearest hospital via ambulance and staff will continue to attempt to contact parents. Parents/Guardians will be responsible for all emergency medical care expenses. Northeast Surfing staff are CPR/First Aid certified and CORI/SORI Checked.

Medications

All Medications (both prescription and over-the-counter) must be checked in at the time you bring your child to the camp with the camp director or the Health Supervisor. Medications must be in the original prescription container with your child’s name printed on the label and placed in a plastic bag. Medications will be stored in the first aid emergency kit. The camp Health Supervisor administers all medication per parent’s instructions.

Re: Northeast Surfing, LLC

To whom it May Concern,

I have reviewed the Medical Policy of Northeast Surfing, LLC, and find their protocol to be appropriate. Specifically, campers are under the supervision of staff trained in CPR and first aid at all times, and are always under their supervision in and out of the water. Their medication administration regimen is appropriate, allergies are checked, and all campers must submit a health waiver signed by their physician. Campers wear color coded rash guards. All staff is CORI and SORI checked.

Sincerely,
